

# LAPTOP SAVER

## LTS-3

Introducing the LTS-3 Laptop Saver 3-legged portable laptop table. This table will save you countless of hours trying to get the folding chair just right, or trying to rig a temporary stand for your laptop.

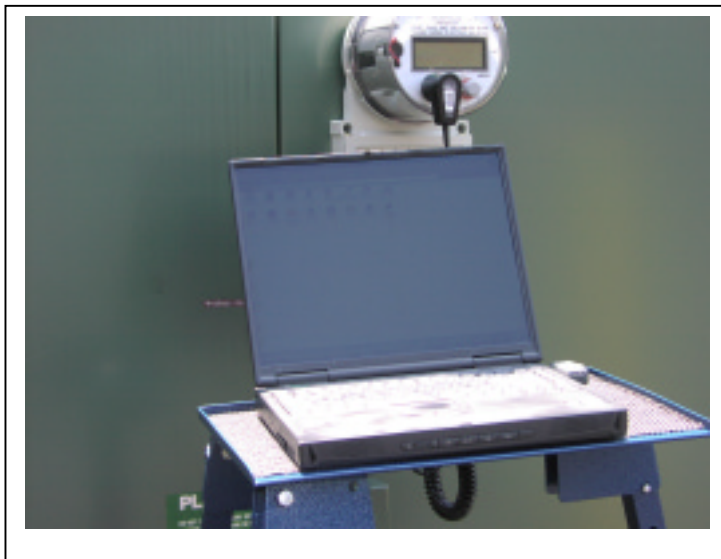

Ever try to hold a laptop in your arm while reading meters? Outside? In the cold? With a 40 mph wind? This will make all the difference in the world.

The LTS-3 works great for any laptop application. Diagnosing machines? Need to run your estimating or engineering software on a job site? This is your answer.

The LTS-3 is lightweight aluminum so it is easy to carry. The three legs collapse and fold up so the entire size of the table is the length and width of the table surface. Each leg has four independently adjustable positions so you can use it on an uneven surface.

The LTS-3 comes with a non-skid surface so your laptop will not slide off. The table also has a raised lip on three sides to keep your laptop, optical coupler, or pen from falling or rolling off.

Use the LTS-3 indoors or outdoors. Easy to carry, easy to set up, easy to use.

The LTS-3 is available from:
